

Lighting Rebates

Discover the Art of Efficiency

Rebates on ENERGY STAR® qualified:

- Ceiling fans
- Compact fluorescent light bulbs
- Lighting fixtures

Lighting fixtures/ceiling fans

How do I qualify?

The lighting fixture and ceiling fan rebates are available to residential and business electric customers of Alliant Energy-IP&L in Iowa.

- You must purchase a new hardwired ENERGY STAR qualified lighting fixture or ceiling fan with lighting.
- Alliant Energy-IP&L must supply the electricity for qualifying equipment.
- There is a maximum of five lighting fixtures and five ceiling fans per installed address.
- Equipment must be purchased between January 1, 2006 and December 31, 2006 and installed by February 28, 2007.
- A sales receipt and completed claim form must be returned within 30 days of installation.
- Failure to complete the claim form will result in a delay processing your claim.
- Rebate amounts will not exceed 50 percent of the cost of equipment.
- Other restrictions may apply.

How do I apply?

- Simply complete both sides of the attached claim form and include a copy of the itemized dated invoice or sales receipt.
- Mail it to the address shown and you will receive a check for the rebate amount directly from Alliant Energy-IP&L.
- Please allow six to eight weeks for receipt of your check.
- If building a new home, contact us for a New Home Construction packet.

We're on for you.™

Lighting can account for as much as 15 percent of the energy used in your home. There's an easy way to decrease that amount by up to 66 percent...by taking advantage of the ease and convenience of ENERGY STAR qualified lighting.

ENERGY STAR lighting provides bright, warm light while using two-thirds less energy, generating 70 percent less heat and lasting up to 10 times longer than standard lighting. And, not only will you save on energy costs, but Alliant Energy-Interstate Power and Light Co. (Alliant Energy-IP&L) offers you cash back on the purchase price!

Compact fluorescent light bulbs (CFLs)

The CFL available today is not the same bulb that you may remember from five years ago. It is available in a variety of different designs, including the traditional look of standard incandescent bulbs.

Furthermore, ENERGY STAR qualified CFLs provide the same amount of light (lumens) as standard incandescent bulbs, but have lower wattage ratings. This means they use less energy. If you are unfamiliar with the best CFL wattage for your lighting needs, always refer to the lumen or light output guide on the product packaging. For example, most 60-watt incandescents provide around 800 lumens, so look for ENERGY STAR qualified CFLs that provide 800 lumens or more.

Qualifying CFLs:

ENERGY STAR - \$2 rebate/bulb (min. of 5, max. of 10)

How do I qualify?

The CFL rebate is available to residential and business electric customers of Alliant Energy-IP&L in Iowa.

- You must purchase new ENERGY STAR qualified CFLs.
- Alliant Energy-IP&L must supply the electricity for qualifying CFLs.
- A minimum of five bulbs per claim form is required with a maximum of 10 bulbs per customer account.
- Equipment must be purchased between January 1, 2006 and December 31, 2006 and installed by February 28, 2007.
- **A sales receipt, model number(s), cut out of the UPC code(s) from each bulb box and completed claim form are required and must be returned within 30 days of installation.**
- Failure to complete the claim form will result in a delay in processing your claim.
- Rebate amounts will not exceed 50 percent of the cost of the CFL.
- Other restrictions may apply.

How do I apply?

- Simply **cut out the UPC code(s) from each bulb box and attach it to a completed claim form along with a copy of the sales receipt** showing the date your bulbs were purchased.
- Mail it to the address shown and you will receive a check for the rebate amount directly from Alliant Energy-IP&L.

Lighting fixtures

Lighting fixtures that have earned the ENERGY STAR combine high performance, attractive design and the highest levels of energy efficiency. As a result, they save energy. ENERGY STAR qualified fixtures are available in hundreds of popular styles, including hardwired fixtures such as cabinet, ceiling fan, ceiling-mount, recessed, suspended, wall-mount and outdoor.

Qualifying lighting fixtures:

ENERGY STAR - \$20 rebate/fixture (max. of 5)

Ceiling fans

Ceiling fans that have earned the ENERGY STAR move air up to 20 percent more efficiently than standard ceiling fans. This can save you from \$15-25 per year on utility bills, plus any additional air conditioning or heating savings you may gain when your fan is operated properly.

ENERGY STAR qualified ceiling fans use improved motors and blade designs. To increase your savings and qualify for the rebate, be sure to purchase a ceiling fan with lighting. ENERGY STAR qualified ceiling fans with lighting use 50 percent less energy than traditional ceiling fans with lighting.

Qualifying ceiling fan:

ENERGY STAR with lighting - \$20 rebate/fan (max. of 5)
